This analysis is based upon the September 30, 2006 actual enrollments at our fifteen elementary schools. Increasing our target class size ranges to **27** for Kindergarten-1st grade, **29** for 2nd-3rd grades and **32** for 4th-5th grades would allow for the reduction of fourteen sections throughout the district, with resulting class sizes in forty sections as indicated below. The only sections not included in this analysis are the six bi-lingual program sections at Brigham. Such a reduction of fourteen sections would change the overall elementary class size average from 22.1 to 23.4.
