

If you are having trouble viewing the PDF documents when trying to print inventory listings, please take the following steps:

- **First, open Adobe Reader by itself, not opening a file.** Choose this from your app launcher or by clicking Start, Programs.
- **Go to Help, select update and let Adobe check for updates.**
- **Select Reader 6.0 updates only (6.01), not the picture viewer or any other application. Let it do the update.**
- **Then, while still in Adobe go to Edit, Preferences. Click the Internet tab and then *deselect* the Display PDF in Browser checkbox.**
- **Click ok/save and then close Adobe.**
- **Inventory print should now open in a new window.**

Internet Explorer has a 'bug' in it that sometimes keeps the PDF from opening in the browser. The problem extends across all Windows operating systems and may or may not be a problem on your computer.
