## Together as a community, we are helping kids like Colton!

Colton was diagnosed with Tetralogy of Fallot before he was born and had to undergo open heart surgery at seven weeks old. The surgery repaired part of the hole in Colton's heart and one of his valves. Colton will need additional surgery to further widen his heart valve as he gets older.

*Colton thanks you, "I want everyone to know that when you donate to the American Heart Association, your money helps my doctors help me so I can survive. Your heart is the only one you get, so you have to keep it safe!"*
